

400V Power Storage Cabinet for Central and Eastern Europe

- A standard 2-hour power backup solution is available for each cabinet, and the independent dual DC port design makes it easy to connect multiple cabinets for a 4-, 6-, or 8-hour expansion solution.

Three-Phase Technology for Efficiency : Our 400V battery bank utilizes advanced three-phase technology, delivering consistent energy output while minimizing power loss. This ensures stable ...

The C& I BESS cabinets are ideal for industries seeking sustainable energy solutions that optimize power storage and distribution. With modular designs, they offer flexibility and scalability to meet the ...

Our Outdoor Cabinet Energy Storage System (QC-215K-O) with Static Transfer Switch (STS) Cabinet (QCB-400V) provide instant backup power during power outages, ensuring production continuity.

As Europe accelerates its transition to renewable energy, outdoor energy storage cabinets have become a cornerstone of the region's energy ecosystem. From residential rooftops to industrial ...

Energy Storage Cabinet in Central Europe: Powering the Future Smartly Why Central Europe is Charging Up with Energy Storage Solutions Ever wondered how Central Europe keeps the ...

The 3rd Edition of the Energy Storage Summit Central Eastern Europe successfully took place in September 2025, bringing together key stakeholders from across the region.

The Atess Bypass Cabinet, 400V, 500kW, is purpose-built for energy storage and power distribution systems, delivering resilience and operational stability in high-demand, mission-critical applications.

Its microgrid solutions integrate distributed energy resources, such as solar PV, wind, and energy storage, to create resilient and self-sufficient power networks ideal for remote communities, ...

The 418kWh BESS Cabinet is a high-capacity all-in-one (AIO) energy storage cabinet built for commercial and industrial (C& I) users who need fast deployment, scalable expansion, and clean ...
