

Australian solar panels roof

Which roof is best for solar panels in Australia?

The orientation and tilt of your roof influence your solar panel system's productivity. Southern and western roofsoften provide the best solar energy access in Australia. Roofs that face north or north-west will also work well. However,eastern-facing roofs may not receive enough sunlight to justify solar panel installations' cost and effort.

Do solar roof tiles work with battery storage systems in Australia?

Yes,solar-integrated roofing systems work with all standard battery storage solutions available in Australia. The DC electricity generated by solar roof tiles is converted to AC by an inverter,just like traditional solar panels. This makes them compatible with popular battery systems from manufacturers like Tesla,LG,and Sonnen.
