

The batteries are expected to cover around two-thirds of the Russian market needs. Two storage battery manufacturing plants are currently under construction in Technopolis Moscow in Krasnaya Pakhra, ...

The exhibition "INDEPENDABLE POWER SOURCES" is an annual specialized platform for presenting the achievements of domestic and global manufacturers of current sources, ...

Moscow has become a hub for battery technology innovation and research. The city hosts numerous conferences, exhibitions, and research centers focused on advancing battery ...

Scientists from Skoltech and Moscow State University (MSU) identified the type of electrochemical reaction associated with charge storage in the anode material for sodium-ion ...

The rapid development of the rechargeable batteries industry requires the exploration of new materials because their properties are the most important factor limiting progress in this field.

6Wresearch actively monitors the Russia Battery Technology Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. ...

The development of lithium-ion batteries and electricity storage systems is carried out with state support within the framework of a federal project approved in 2024.

MOSCOW, Sept 23 (Reuters) - Russia's Nornickel opened an R& D centre in St. Petersburg on Monday to study the use of nickel-containing cathode active materials in electric batteries, marking...

Due to the growing awareness of climate change and the need for clean energy, Russian government encourages the development of the battery industry. In this article, we will learn about ...

The ultimate goal is to design temperature-tolerant and safe battery chemistries, which deliver energy in the extended temperature interval (-100 - +100 °C). We focus on both non-aqueous Li-ion and Na-ion ...
