

Black Maximum Solar Power

An all-in-one standalone off-grid and on-grid power system, BlackMax was RedEarth's original product, created with the idea of providing electricity where it isn't.

A: The Sure Power inverter in the BlackMax system requires a generator with certain output specifications. These specifications are provided by the generator manufacturer.

Let's face it - most solar installations operate like part-time employees, only giving their best effort when the sun's shining directly overhead. But what if I told you about a black maximum solar power ...

It is available as either a battery system alone or as a complete PowerStation kit including solar panels and solar panel mounting equipment, all on two pallets.

The BlackMax Solar Power System is an all-in-one integrated standalone power system and is designed for applications with a daily power use from as little as 2kWh/day to more than ...

To make installation of the BlackMax as easy as possible, RedEarth also provides an all-in-one BlackMax Powerstation Kit that includes solar panels and mounting hardware--all on a single pallet.

This compact off-grid power system provides up to 12.3kWh storage and a 6kW power output via the BlackMax Deye inverter, complete with backup generator functionality.

The RedEarth BlackMax is an all-in-one integrated power standalone system. It comprises of a lithium battery, solar PV charger that charges the battery bank, plus an inverter to provide power to AC ...
