

Canadian Solar 265 photovoltaic panel parameters

How reliable are Canadian solar modules?

High quality and reliability in all Canadian Solar modules is ensured by 14 years' experience in module manufacturing, well-engineered module design, stringent BOM quality testing, an automated manufacturing process and 100% EL testing.

Why should you choose Canadian Solar?

The high quality and reliability of Canadian Solar's modules is ensured by 15 years of experience in module manufacturing, well-engineered module design, stringent BOM quality testing, an automated manufacturing process and 100% EL testing. *For detail information, please refer to Installation Manual.

What information is included in the Canadian Solar datasheet?

The aforesaid datasheet only provides the general information on Canadian Solar products and, due to the on-going innovation and improvement, please always contact your local Canadian Solar sales representative for the updated information on specifications, key features and certification requirements of Canadian Solar products in your region.

What is a 1500 volt solar module?

Canadian Solar's new 1500 V module is a product for high voltage systems, which can increase the string length of solar systems by up to 50%, saving BOS costs. Heavy snow load up to 5400 Pa, wind load up to 2400 Pa *Black frame product can be provided upon request.

The high quality and reliability of Canadian Solar's modules is ensured by 15 years of experience in module manufacturing, well-engineered module design, stringent BOM quality testing, ...

High quality and reliability in all Canadian Solar modules is ensured by 14 years' experience in module manufacturing, well-engineered module design, stringent BOM quality testing, ...

Let's break down the key parameters: The CS6R-MS model packs 410W output in a 2,094mm x 1,032mm frame - that's like fitting a small power plant into an area smaller than two parking spaces. ...

Manufacturer Spec sheet/data sheet for the Canadian Solar CS6K-280M 1500V (280W) solar panel. [pdf]
[FAQS about Canadian Solar 280 photovoltaic panel parameters]

Outstanding performance at low irradiance, with an average relative efficiency of 96.5 % for irradiances between 200 W/m² and 1000 W/m² (AM 1.5, 25°C).

Canadian Solar's new 1500 V module is a product for high voltage systems, which can increase the string length of solar systems by up to 50%, saving BOS costs. Heavy snow load up to ...

Canadian Solar's modules use the latest innovative cell technology, increasing module power output and

Canadian Solar 265 photovoltaic panel parameters

system reliability, ensured by 15 years of experience in module manufacturing, well ...

When you're looking for the latest and most efficient Canadian Solar 265 photovoltaic panel parameters for your PV project, our website offers a comprehensive selection of cutting-edge ...

Complete guide to 265W solar panels including specifications, pricing, top models from LG, Canadian Solar & more. Expert reviews & buying advice for 2025.

Canadian Solar's SmartDC module features an innovative integration of Canadian Solar's module technology and SolarEdge's power optimization for grid-tied PV applications.
