

In this exclusive roundtable, we will discuss how the future of the solar and energy storage industries will take shape on an international level.

A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

The bottom line? Chinese storage providers aren't just exporting products - they're establishing new operational blueprints that European utilities are scrambling to adopt. With 56.5 GWh of global ...

Both regions have rolled up their sleeves to tackle grid instability and renewable intermittency through bold policy frameworks. But here's the kicker: China-Europe energy storage ...

China's massive 30-megawatt (MW) flywheel energy storage plant, the Dinglun power station, is now connected to the grid, making it the largest operational flywheel energy storage facility ever built.

Longi has also officially announced the establishment of its first Solar-Storage Technology Innovation Center (Center of Excellence) in Europe.

China is currently the world's largest market for energy storage, followed by the US and Europe, according to BloombergNEF. This position was driven by a combination of market need for ...

Global battery cell oversupply driven largely by China and is set to continue China lithium-ion battery cell production capacity overlaid by global lithium-ion battery demand

China and European solar and storage leaders met in Düsseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage...

Industry leaders from China and Europe met in Düsseldorf for the China-EU Solar & Energy Storage Industries Dialogue 2025, launching a bilateral storage cooperation platform and ...
