

China's solar power enters Africa

Chinese investment in Africa's solar power sector is reshaping energy access in remote mining regions. With over 600 million Africans still lacking electricity, Chinese firms are flooding the ...

Africa is rapidly scaling up its solar power capacity, with imports of Chinese solar panels surging 60% in the 12 months to June, according to climate think tank Ember. China, which...

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several factors helping the continent gain traction with...

According to a new analysis of China's solar panel exports data from energy think tank Ember, solar panel imports into the continent jumped 60% in the 12 months through June 2025, ...

African imports of Chinese solar panels over the last year jumped by 60% to over 15 MW, a new record. The clean energy research body Ember published a report yesterday detailing ...

Africa's solar imports from China hit 15 GW in 2025, up 60%. Record growth signals a clean energy boom, but capacity still lags global pace.

A report shows that Africa has emerged as the world's fastest-growing solar market even as global growth slowed last year, driven by a 60% surge in imports of solar panels from China.

(Yicai) Aug. 1 -- Competition in the photovoltaic power industry of some African countries has intensified since the beginning of the year, as more and more Chinese firms are investing in the continent to ...

That is according to a new analysis of China's solar panel exports data from energy think tank Ember. "The take-off of solar in Africa is a pivotal moment," said Dave Jones, Ember's chief ...

In May 2025, African countries imported a combined 1.57 Gigawatts of solar panels from China, an all time high. (Think of it as adding three-fourths of the capacity of the Hoover Dam in one...
