

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Zeljko Tuksa, President of the Managing Board of Koncar - Power Plant and Electric ...

Croatia's first large-scale battery energy storage system (BESS) with 66 MW capacity should be completed and commissioned in 2025, its investor IE Energy told Montel on Thursday.

The battery system will have a discharge capacity of 38 MW and a storage capacity of up to 70.8 MWh, designed to operate for around twenty years. An environmental assessment is required because the ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in ?ibenik.

The Croatian government has allocated almost EUR20 million (\$23.2 million) of European Union Modernization Fund grants to help complete a 60 MW/120 MWh battery energy storage system (BESS) at ...

Croatian aluminium processing company Impol-TLM, a subsidiary of the Slovenian Impol Group, has received 19.8 million euros in funding from the Modernisation Fund to build the second phase of a 60 ...

In Croatia, seven geothermal exploration fields have been announced and licences for geothermal water exploration in 28 areas and six preliminary research areas have been granted.

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations.

The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing for more flexible energy management without the immediate need to feed ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a ...
