

DDC Lithium Battery Cabinet for Oilfield Use Middle East

Introduction: Ever wanted to have laptop-like control over your desktop monitor from inside the OS? This might be the guide for you. A lot of monitors out there today support a really neat ...

Add this: DDC is essentially air cooled, and so runs hotter and requires a heat sink. D5 is cooled by water it pumps and so runs cooler. You can't really go wrong with either D5 or DDC. IMO ...

You need a good flow meter (the only accurate one is the Aqua Computer high flow sensor). Then you can only know how fast the DDC needs to spin to reach the same flowrate as the ...

A DDC-1 with a blue impeller is a mixed component pump. The inlet on the blue impeller is much smaller than the black impeller. The old DDC-1 tops have a wider inside hole to dump the ...

The Display Data Channel, or DDC, is a collection of protocols for digital communication between a computer display and a graphics adapter that enable the display to communicate its ...

Hello, I bought a DDC pump for very cheap on ebay (new, around 30\$ US), and I have problems with the non-standard Wiring. This seller seems to own tons of cheap DDC pumps, so it ...

DDC/CI stands for Display Data Channel Command Interface and basically allows monitor control via the graphics card. This is not like the software methods in your GPU control panel ...

DDC gives more headpressure than a D5. A D5 is more silent tho, but is a lot bigger. In a low to medium loop restriction loop, both will perform the same. The DDC will have the edge in a ...

I can't seem to find some info about the DDC 4.2 PWM if its good or bad. Noisy or quiet compared to a D5 pump Anyone who got experience with that pump? reason is that i'm considering ...

I have three DDC 3.1 PWM pump/res combos (2 EK, 1 Bykski), no issues, the oldest has been going over 3 years in a system with 2 rads, CPU and GPU. It is not silent but I would not say it ...
