

Discount Offer for High-Efficiency Foldable Containers Used in Ports

What is a foldable cargo container?

A foldable cargo container looks like a traditional container, but it offers the opportunity of saving space when it's not being used. This type of container can be folded vertically and horizontally with the port's standard machinery and, of course, handled with container spreaders. Why do we need to save space in shipping cargo?

Why is a foldable container important?

The foldable container appears for one main reason: saving space. The logistics of returning empty containers after unloading their cargo to their origins not been looked at from the point of view of economic savings and, as a consequence, an improvement of the environment. Approximately 40% of shipping cargo trips only carry empty containers.

Can a foldable container save CO₂?

With a foldable container that saves up to 37% in costs and CO₂. We are calling all shippers and shipping lines to take responsibility and start saving CO₂ with 4FOLD now. Without action the shipping industry will account for 10% of the global CO₂ emissions in 2050. This is much higher than the CO₂ target under the Paris agreement.
