

Distribution of solar sites in Finland

Map application by Renewables Finland.

Finland's large-scale solar capacity more than doubled in 2025, buoyed by the commissioning of the country's first solar projects larger than 50 MW. Another record year for ground ...

Listed below are the five largest upcoming Solar PV power plants by capacity in Finland, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together accelerated ...

Blackridge Research's Finland Solar Power Market Outlook report consolidate the developments and build a perspective on growth from the point of view of the solar sector, in its current and future role.

The solar heating has not been competitive due to cheap alternatives (electricity, fuel oil and district heating) and the lack of support systems. Companies and public organizations may receive 40% ...

The solar power plants greater than 1 MW currently being planned, under construction or in production can be viewed using the map service. In addition, the total unconnected solar power ...

The first is an annual statistic covering operational solar power projects, while the second lists projects under construction and third lists . With this data, we provide a comprehensive view of the current ...

This study aims to optimize the geographic distribution of wind power and solar PV installations in Finland while minimizing costs to support the renewable energy transition of the country.

Solar power generation forecasts are based on weather forecasts, estimation of the total installed solar panel capacity and the estimated locations of the panels in Finland.
