

# Double throw breaker for sale in Canberra

Are two pole circuit breakers available in Australia?

Two pole circuit breakers are available with fast dispatch and fast delivery Australia wide, including metropolitan and regional areas. Can two pole circuit breakers be used for replacements or upgrades? Yes. They are suitable for replacing existing breakers or upgrading older switchboards. Do two pole circuit breakers come with a warranty? Yes.

What is a two pole circuit breaker?

A two pole circuit breaker is a protective device designed to simultaneously disconnect both the active and neutral conductors in a single-phase electrical circuit when a fault occurs. What happens when a two pole circuit breaker trips? Power is disconnected to both conductors, stopping electricity flow to the protected circuit.

What is a single throw breaker?

A single throw breaker is the same as a single wire breaker. Now, the amount of wire required to handle a single-row breaker will depend on the actual load. As mentioned above, licensed electricians recommend using a single-conductor breaker. A single-thread breaker is a type of breaker that can handle up to 240 Volt circuits.
