

EZVIZ Solar Camera Bracket

Do ezviz batteries work with solar panels?

Please check for compatibility before purchasing. Connect your EZVIZ battery-powered camera to our Weatherproof Solar Panel to capture the sun's free, clean energy - and enjoy year-round security. Non-stop protection. Made of single crystalline silicon solar cells, the Solar Panel delivers up to 6.18 W of power.

How to install a solar panel on a security camera?

With an adjustable bracket that rotates 360 degrees and a 4-meter-long cable, the Solar Panel offers incredible flexibility. Mount your security camera where you need it, then find a sunny spot to install the solar panel. With 4 meters (13 feet) of cable, you will get the flexibility you need for great security and continual power.

What makes ezviz a smart home?

At EZVIZ, we design products with sustainability in mind, building a smart home that's ready for the future and responsible for the planet. By integrating the use of solar technology and planting forests, we enable you to live a smart lifestyle with less carbon emissions.

How to use AOV mode on ezviz Eb3?

To use this function, a compatible microSD card (sold separately) must be inserted into the camera. When the AOV mode is enabled, according to EZVIZ Lab's test results under standard conditions, the EB3 is able to detect movements at a distance of up to 25 meters during the day, and up to 12 meters during the nighttime.
