

Electric vehicles helsinki

How many electric cars are there in Finland?

To give you a picture, just a couple of years ago, in 2022, only 17% of new cars in this country were electric, and last year it went up to more than 33%. All in all, the situation is clearly shifting towards sustainable development and more conscious driving. Why are Electric Cars Popular in Finland?

Why are electric cars becoming more popular in Finland?

Factors contributing to the growth of electric cars in Finland: No car tax on fully electric cars: Starting in October 2021, removing the purchasing tax on fully electric cars has made buying them slightly cheaper upfront. As a result, more people can afford to join e-mobility now.

Does Finland offer subsidies for electric cars?

Government procurement subsidies: Up to December 2022, Finland offered subsidies for low-emission vehicles including electric cars. The subsidies reduced the initial cost barrier associated with purchasing electric cars. This made electric vehicles more economically viable for both individual consumers and corporate entities.

What are Finland's tax incentives for Electric Company cars?

Increased incentives for rechargeable company cars: The Finnish government has provided several different tax incentives for all-electric company vehicles. For instance, the tax value of fully electric company cars has been deducted by EUR170/month.
