

How many people in Yemen have electricity?

Only 23% of Yemenis living in rural areas where the national grid system is unavailable in most villages have access to electricity; about 10-14% are connected to the national grid system, and the rest are estimated to have access from other sources, such as a diesel generator or a few solar panels.

How much energy does Yemen use?

Source: IEA, "Electricity final consumption by sector, Yemen 2009-2015." Although the annual energy consumption per capita was very low (less than 300 kWh) and less than 2 million subscribers were connected to the national grid as of 2012, the national grid was unable to meet the demand of the connected consumers.
