

# Energy storage container lock rod assembly

Are Powerbrace lockrods AAR certified?

Powerbrace factory assembled lockrod models are manufactured to exacting standards and are tested to AAR Specifications for U.S. and Canadian trailers and domestic containers. All Powerbrace lockrods meet or exceed end-wall force requirements prescribed by the American Association of Railroads (AAR).

What is a container fastening system?

After years of development, the container fastening system has produced a variety of container fixed securing technologies, such as container technology for special lashing of containers, general-purpose container fastening technology for multi-purpose container lashing parts on ships that meet OSHA requirements Fastener technology. And many more.

What is the difference between A lockrod and a keeper?

Lockrod assemblies are typically welded complete with top and bottom cams and lever assembly. Lockrods may be ordered with the top cam unattached for field length adjustment (Top End Loose TEL). Keepers, specific to the model, are ordered separately with desired offset, material and finish.

What kind of tubing does a lockrod use?

All our lockrod models feature heavy-duty high-yield (55,000 psi minimum) low alloy tubing for maximum strength, long life and optimum performance. Standard finish is Hot-dip Galvanized, but other finishes are also available.
