

European photovoltaic balcony bracket brand

How much electricity does a balcony solar system generate in Germany?

*Data based on average user scenarios of a balcony solar system in Germany. The annual power generation of Anker SOLIX RS40P is 890kWh; the annual power generation of an alternative balcony solar system is 757kWh. The electricity price was EURO.40/kWh in August 2023.

What is a balcony power storage system?

Balcony Power Storage System increases solar power efficiency and reduces electricity consumption from the grid. Nearly all of that solar power generated during the day goes to your home or is stored for later use. And with a plug-and-play setup and a wide range of functions, you can relax while powering your home with sustainable energy.

Can a balcony be used as a power plant?

Use balcony brackets to turn your balcony into a green energy power plant (for 410W and 445W PV panels only). Customize your energy based on your home's needs and area's sunlight conditions. Even when you're on vacation you can manage your energy storage. Let us deliver Balcony Power Storage System, even if you live in an upstairs apartment.

What is the self-consumption rate of a balcony Solar System?

The self-consumption rate of an industry-average balcony solar system by itself is 40%; the self-consumption rate of a balcony solar system with 1kWh storage is 73%; the self-consumption rate of Anker SOLIX Balcony Power Storage System is 90%. Make power easy to understand with the Anker app.
