

# Export certificate for solar power generation system

Can I export solar energy?

However, solar storage is covered by the SEG in some instances, meaning that if you export stored energy you could still qualify for the export tariff. This differs with suppliers, though, so be sure to consult your licensee first. Hydropower, energy that you generate from water, is another popular choice for renewable electricity.

What is the Smart Export Guarantee (SEG)?

Under the Smart Export Guarantee (SEG) you will be paid for every unit of electricity that you feed back. You won't be paid for any that you use yourself. You need to have a renewable electricity generating system that meets the SEG eligibility requirements. You must have a meter capable of providing half-hourly export readings.

Which technologies qualify for the Smart Export Guarantee?

The following technologies qualify: The Smart Export Guarantee is also open to Micro-Combined Heat and Power (micro-CHP) up to a capacity of 50kW. All installations must be accredited by the Microgeneration Certification Scheme (MCS) or equivalent.

How do I get a Smart Export Guarantee?

Get in touch with your energy supplier to see if they offer this. The Smart Export Guarantee is a support mechanism that ensures people that generate their own electricity are paid for electricity they export to the grid. This doesn't happen automatically, so you need to sign up to get the SEG tariff.

The Smart Export Guarantee allows us to pay you for the solar energy you generate and export. Explore our range of SEG options today.

Export Meter (Generation Meter) If your solar installation exceeds 30 kilowatts (kW) you will need an export meter if you want to send power to the grid and get paid for it.

Overview of Export Certification Requirements for Solar Structures When seeking export certification for solar structures, it's crucial to understand the specific requirements that vary by ...

The Smart Export Guarantee ensures people that generate their own electricity are paid for the electricity they export to the grid.

If you have installed solar PV panels or other eligible renewable electricity generation in your home or business, you may be able to earn money through the Smart Export Guarantee (SEG).

Smart Export Guarantee (SEG) provides an export tariff for homeowners. It covers 4 types of renewable technologies, including solar PV. Read our full guide!

solar photovoltaic (solar PV) wind micro combined heat and power (micro-CHP) hydro anaerobic digestion

# Export certificate for solar power generation system

(AD) Installations must be located in Great Britain and meet the applicable ...

Solar power generation systems include solar cell modules, battery packs, an inverter system, and a solar control system. Among these, the part that requires dangerous goods ...

The global solar energy market is thriving in 2025, with China maintaining its leadership as a top exporter of photovoltaic (PV) products. At a recent press conference on January 13, 2025, L&#252; ...

The Smart Export Guarantee (SEG) will ensure small-scale electricity generators installing solar, wind or other forms of renewable generation with a capacity up to 5MW will be paid for each unit ...
