

The Pajamäki Solar System Scale Model is a scale model of the Solar System built in Helsinki and partly in Espoo, Finland in 1992. Its scale is 1:1 000 000 000, i.e. one to one billion, so that 1 millimeter in ...

Learn Finnish for free and become fluent thanks to a complete course with vocabulary, grammar, and cultural historical insights. Master Finnish in only 30 days.

The center of the scale model, the Sun, is located at the top of the Patterinmäki in Pajamäki, at the top of a 20-meter pole. It is made of steel pipes, and its diameter is 1.4 meters. The planets are placed on concrete posts so that their distances to the sun are in scale. The sizes of the planets are also in scale: e.g. the size of Mercury is only 4.9 millimeters. There are explanatory texts on the model and the planets near the models in special tables. The texts are in Finnish, Swedish and English.

Discover structured, step-by-step Finnish lessons that help you speak Finnish with confidence and ace the YKI exam.

The coordinates given for the model are those for the Sun in Patterinmäki. The model was designed by the amateur astronomer Leo Sulamaa, who has had his own observatory in Pajamäki.
