

Futing Village Solar Power Station

Startups are harnessing the power of the Sun, encouraging solar energy adoption in India's villages through handlooms, farming and electricity needs.

For a millennium the Hindu Sun Temple of Modhera has inspired devotees who pay tribute to the solar deity Surya. Now, the sun is giving back in the form of electricity by lighting up both the...

The photovoltaic power station, built upon 1,851 mu (123.4 hectares) of saline-alkaline land, generates over 80 million KWH of power per year. (Photo: Xinhua)

A remote border village in North Sikkim has received uninterrupted electricity for the first time after the Indian Army, under the Trishakti Corps, commissioned a 10 kW solar power plant at...

The Indian Army's Trishakti Corps recently commissioned a 10 kW solar plant at 15,000 ft in Sikkim to serve the village of Muguthang. This high-altitude settlement sits precariously close to ...

Discover how smart solar solutions can revolutionize rural villages with solar power systems, solar panels, and clean energy.

The company had the land filled in and leveled and then built a photovoltaic power station there. Rows of solar panels were installed, and beneath them, villagers grow crops and raise ...

In this blog, we delve into the technical aspects of implementing solar energy for remote villages in India, highlighting the potential, challenges, and roadmap to a brighter, cleaner future. Understanding the ...

The Solar Energy Foundation provides all households with a basic power supply with solar energy at a subsidised price: it consists of 2 LED lamps as well as the possibility of mobile phone charging. The ...

The Solar powered village will have over 1000 solar panels, that have been installed on the village houses, generating electricity round the clock for the villagers to provide solar electricity at ...
