The Wind Power

Generalities Wind farm name: Hailing Island Country: China County / Zone: Guangdong

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

China has successfully completed the first flight of its home-designed floating wind turbine, the S1500, in Hami, Xinjiang. The system passed strict tests, including full desert assembly ...

Heilongjiang Hailin Hufengling Wind Farm is a 49.5MW onshore wind power project. It is located in Heilongjiang, China.

This project brings substantial clean energy benefits. Once fully operational (expected by late 2025), the 504 MW wind farm will generate around 1.7 billion kWh of green electricity per year.
