

Hexagon Energy Storage Container Hybrid Customer Support

Who is hexagon?

Hexagon was founded in 2015 with a clear vision: to establish a distinctive role within the energy logistics market. Our journey began with a commitment to filling a crucial gap in the industry, and over the years, we have grown into a respected player in offering niche comprehensive solutions for the storage and transportation of energy products.

What is hexagon Purus' hydrogen storage system?

Hexagon Purus' hydrogen storage system is adapted to individual conditions in terms of storage amount, pressure level, space and positioning inside or outside the vehicle. Lightest and safest material combinations, which reduces vehicle mass and enhances handling and drivability.

Where can CIMC-hexagon be installed?

CIMC-Hexagon offers innovative and customizable ground storage solutions for hydrogen: our containers can be installed behind the refuelling station, on industrial or construction sites to provide necessary volume of hydrogen gas for your operations. Please type your message and our team will get back to you shortly.

Conversely, a storage system without the fuel cell as an energy converter is merely a passive container. Only through the precise interaction of both technologies can a practical, emission-free drive system ...

SYSTEMS Hexagon X-STORE™; container module solutions for a cleaner energy future. We are adapting our leading composite pressure vessel technology for a wide range of mobility and ...
