

Honduras community microgrids

Does Honduras have a power grid?

Honduras's power grid is extensively developed in all departments except the easternmost department, Gracias a Dios. Honduras has granted distribution concessions to 7 utilities nationwide, with the state-owned Empresa Nacional de Energía Eléctrica (ENEE) managing nearly 99% of the electricity grid. electricity. lowest electricity access rates.

What is an example of a community microgrid?

For example, a community microgrid in a rural area may have different objectives than a community in an urban setting [12,20]. The rural community may prioritise energy independence and self-sufficiency, while the urban community may focus on reducing greenhouse gas emissions or increasing access to affordable energy .

How does a community microgrid work?

This, in turn, influences the technical design and overall feasibility of the community microgrid based on the community type. For example, in a community-owned microgrid, community members may have the ability to produce and consume their own energy, leading to a more balanced prosumer/consumer ratio.

What is a community-owned microgrid?

For instance, community-owned microgrids may outsource the planning, construction, and operation of the system . In such cases, even though the community has ownership, the decision-making and control might be distributed across external actors .
