

How to account for solar power generation companies

Do solar power plants need accounting?

The IRENA's report for the year showed that solar and wind were again at the helm of new renewable capacity. Even as the sector celebrates its growth, the right accounting approach is imperative for solar power plants. Proprietors and operators of solar power plants should consider several in the accounting of their facilities.

Why do solar companies need a chart of accounts?

Having a well-designed chart of accounts is crucial for renewable energy businesses, such as those involved in solar power. The industry involves unique financial aspects like federal and state tax incentives, grants, renewable energy credits, and project-specific funding. A tailored COA can help track these complex transactions more effectively.

How do you account for a solar energy lease?

Some solar power projects choose this path as a financial strategy. Modern accounting standards recommend two ways to account for this lease namely operating leases and finance leases. Operating leases are for rental transactions while finance leases go with purchase and sale transactions.

How to invest in a solar power plant?

Investment in a solar power plant is in most cases characterized by fixed assets that carry most of the cost. The most notable pieces of equipment, in this instance, include solar PV modules, batteries, meters, and energy storage systems (ESS). But also remember to consider the not-so-obvious power generating equipment.
