

Hydro quebec battery technology

Aimed at validating a TRL-4 level of our Aluminium-Ion battery technology, Quebec's Centre d'Excellence will be supporting the ...

Our major breakthrough involving ultrathin lithium anodes and remarkable advances in polymer technology have positioned ...

According to Hydro-Quebec's estimate based on 3,060,000 kWh of usage, 5,000 kW of power and a 85% load factor. ** The electricity rate is the same for all of Quebec; there is no rate variation ...

A rapid-charging and non-flammable battery developed in ...

Our company is a fully-integrated battery energy storage systems and solutions provider that's driving the energy storage market forward. Visit us to learn more.

Our aim is to develop ultra-high-performance battery technologies and storage systems that will accelerate transportation ...

Our research has lead to patented solutions that will be used to build a battery that is safer, more efficient, more durable, and both easier and ...

This project represents a major step forward. It is the first fully automated battery storage system in North America to ensure continuity of service in the event of an outage on ...
