

Master of New Energy and Smart Microgrid

At the CLNB 2025 (10th) New Energy Industry Chain Expo - Battery Raw Materials Forum hosted by SMM Information & Technology Co., Ltd. (SMM), Mengdie Wei, Product Manager of Jiangsu Fanye ...

The MSC in Electrical Power and Smart Grids is a unique programme that focuses on operation, control and maintenance of future Smart Grid with particular emphasis on the challenges associated with ...

Our research expertise in Renewable Energy Technologies specialises in areas including renewable energy, smart grids, novel wind energy harvest technologies, energy storage systems, energy saving ...

Conduct research, design, and development of power electronic converters (DC/DC, DC/AC, AC/DC, multilevel) for EV charging and microgrid applications. Integrate renewable energy ...

Our subplan in NGPES helps engineers and decision makers prepare for this next generation -- with deep foundational knowledge, modern technical skillsets, and the ability to effectively participate in ...

Smart Energy Trading: Integrating AI with blockchain enables peer-to-peer energy trading and flexible dispatch of distributed energy, accelerating the adoption and commercialization of clean energies.

Gain the advanced technical skills and entrepreneurial mindset to transform the electrical power sector. This Master's programme empowers you to design next-generation smart grids and integrate ...

Northwestern University's Master of Science in Energy and Sustainability (MSES) prepares its students for leadership roles at the dynamic intersection of technology, business, and public policy in energy ...

Master of Engineering in Smart Grid Systems and Technologies covers electric utility, renewable, distributed generation, electrical and microgrid power systems.

Our company was successfully listed on the National Equities Exchange and Quotations (NEEQ) in 2017. The stock is abbreviated as Infracwin Energy, with the stock code 871504. Our ...
