

What is the data center server rack market size in 2023?

Europe is another significant market for data center server racks, with a market size of around \$1.2 billion in 2023. The region is characterized by stringent data protection regulations, such as the General Data Protection Regulation (GDPR), which drive the demand for secure and compliant data center solutions.

What is the data center server rack market?

The data center server rack market is segmented by rack type into open frame racks, rack enclosures, and wall-mount racks. Open frame racks are widely adopted due to their cost-effectiveness and ease of access. These racks are typically used in environments where security is less of a concern, and airflow management is paramount.

Why is North America a leader in the data center server rack market?

North America holds a dominant position in the data center server rack market, driven by the presence of numerous technology giants, a high level of digitalization across various industries, and substantial investments in data center infrastructure.
