

Microgrid Research Institute

This project intends to compile and refine processes for designing, evaluating, and commissioning microgrids (with a focus on the latter stages of development). An emphasis will be to identify gaps in ...

This information can be used to develop research and development agendas for next-generation microgrids that provide cost-effective, reliable, and clean energy solutions.

The Smart Microgrid and Renewable Technology (SMRT) lab is a power converter based microgrid testbed. The facility consists of four types of subsystems, i.e., ...

The Center for Microgrid Research is dedicated to improving the reliability and resiliency of our electric grid through cutting-edge research, educational programs, and strategic partnerships.

Microgrid Institute is a collaborative organization that addresses key issues affecting the development of microgrids and distributed energy resources (DER) ...

UW-Madison researchers focus on developing microgrid systems with even higher efficiencies, higher reliability, and an increased capacity for integrating clean ...

Growing the clean energy technology sector in Saskatchewan takes research, experimentation, collaboration, and...money! New funding will allow the ...

The Galvin Center brings together universities, industry, government, and non-profit research entities to plug into Illinois Tech's microgrid, research laboratories, and ...

The TESLAB@MAE comprises of unique test facilities for investigating Sustainable Cryogenics & Cold Energy Systems. The test facilities serve to evaluate the ...
