How much is the microgrid market worth in 2021?

The microgrid market was valued at USD 11.4 billion in 2021 and grew at a CAGR of approximately 26% through 2024, driven by growing advancements in smart grid technology, energy management software and energy storage systems aimed at improving microgrid scalability and efficiency.

What is the market size of AC microgrid?

Based on grid type, the industry is segmented into AC microgrid, DC microgrid and hybrid. The AC segment dominates the market with 51.9% share in 2024 and is expected to grow at a CAGR of 19.2% from 2025 to 2034.

What is the global microgrid market size?

The global microgrid market size was estimated at USD 76.88 billion in 2023 and is expected to grow at a compound annual growth rate (CAGR) of 17.1% from 2024 to 2030. Rising power demand in developing countries including Mexico, China, India, and Russia as a result of growth in household and industrial sectors is expected to be a driving force.

Why is the microgrid market growing?

The impressive growth trajectory of the Microgrid Market is driven by factors such as increasing emphasis on decarbonization, growing need for reliable and uninterrupted power supply, and the surging deployment of microgrids for rural electrification.

A microgrid is a small power grid with defined boundaries that can operate both when connected to the larger electrical grid and as an "island" when there's an interruption on the main grid. It draws on ...

A microgrid is an isolated energy system that may work independently or simultaneously with the larger power grid. Such systems draw power from multiple sources of energy, including ...

The microgrid market is set to expand significantly over the next decade, driven by rising demand for resilient and decentralized energy systems. Microgrids enable reliable power supply, integration of ...
