

# Mobile power box effect

How does the mobilize Powerbox work?

Safe to use, the Mobilize PowerBox integrates into the electrical ecosystem of the place where it is installed. Its dynamic energy management modulates the charging power according to the power available, thus avoiding tripping the system. The Mobilize PowerBox terminal operates on alternating current (AC).

How much power does a mobilize Powerbox deliver?

Depending on the electrical installation and the vehicle's charging capacity, it can deliver charging power of up to 22 kW. Mobilize PowerBox is compatible with all electric and plug-in hybrid vehicles fitted with a type 2 socket. The UNO PLUS version is designed for infrastructures installed in businesses or condominiums.

When will the mobilize Powerbox be installed & ready for use?

The Mobilize PowerBox will be installed and ready for use as soon as the vehicle is delivered. The Mobilize brand dedicated to recharging solutions, Mobilize Power Solutions, is responsible for setting up the Mobilize PowerBox.

What is the mobilize Powerbox charging point?

The Mobilize PowerBox charging point will soon be available in the Renault network for all Renault Group brand electric vehicles, starting of course with the Renault 5 E-Tech electric. The Renault network is a genuine "one-stop shop", enabling customers to order their vehicle and charging point at the same time.
