

Much does it cost to lease solar panels

How much does it cost to lease solar panels?

The average cost to lease solar panels ranges from about \$50-\$250 per month. Leasing is one of the options available to homeowners for financing a solar installation.

Can you lease solar panels?

Leasing solar panels is like leasing a car: you don't own the solar panels, but you do get to use the solar energy they produce for a fixed monthly payment to the solar company. Solar lease payments are typically designed to be lower than your pre-solar electricity bill, so you'll still see savings every month.

Should you buy a solar lease?

Solar leases can be particularly appealing to those who want to use environmentally friendly energy but are unwilling to pay the upfront cost. With a lease, you can enjoy the benefits of a solar system without having to buy solar panels or come up with a large down payment.

How much does a solar system cost?

But in just the last 12 years, the cost of an average solar system has cut in half, from \$40,000 to \$20,000, according to the Solar Energy Industries Association (SEIA). Coupled with the 30% federal tax credit, that's made buying solar panels much more affordable and the lifetime savings of ownership much greater.
