

Ottawa plug-in electric vehicles phev

How much will Ottawa spend on EV infrastructure in Canada?

Ottawa is planning to spend more than \$84 million to add 8,000 electric vehicle charging ports to Canada's existing stock of more than 30,000 chargers. Prime Minister Mark Carney said last week Ottawa would spend \$1.5 billion on EV infrastructure in Canada as part of a suite of changes to the federal auto strategy.

What is a plug-in hybrid electric vehicle (PHEV)?

A plug-in hybrid electric vehicle (PHEV) could be your perfect match. These vehicles combine the benefits of electric driving with the flexibility of a traditional engine, offering an ideal middle ground for Canadian drivers who aren't ready to go fully electric.

How many electric vehicle chargers are there in Canada?

OTTAWA -- The federal government is looking to scale up the number of electric vehicle chargers across the country as part of its new automotive strategy. Ottawa is planning to spend more than \$84 million to add 8,000 electric vehicle charging ports to Canada's existing stock of more than 30,000 chargers.

What is a PHEV & how does it work?

There is nothing complicated about a PHEV. Just like a hybrid electric vehicle (HEV), it has both a gas engine and electric motors, and automatically switches between electric-mode only (EV mode), gas-mode only, or a seamless combination of both.
