

Outdoor power supply quick charge

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

How do you charge a portable power station?

Portable power stations are usually charged via the mains- it's quick and efficient, especially for higher-capacity units. Many also let you charge the device from the car using a 12V cigarette lighter socket - ideal for those living the van life or in the RV. You can recharge some devices using solar panels, too.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.

How long does it take to recharge a portable power station?

For example, a 1,000-watt-hour power station that's receiving a consistent stream of 200 watts of power from a solar panel would take about 5 hours to recharge. Keep in mind, this is assuming uninterrupted, direct sunlight conditions, which, even then, may produce varied results. Are portable power stations weather-resistant?
