

# Pakistan entry requirements for outdoor power supplies

What is the supply voltage in Pakistan?

In Pakistan the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

Do I need a converter in Pakistan?

This means that you will not need a converter or transformer but just a travel adaptor, because Pakistan operates on a 230V supply voltage, which is within the 110-240V range that the dual voltage appliance operates on. In Pakistan the supply voltage is 230V.

Why do I need a voltage converter in Pakistan?

As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Pakistan. If the frequency is different, the normal operation of an electrical appliance may also be affected. For example, a 50Hz clock may run faster on a 60Hz electricity supply.

Is it safe to use a transformer in Pakistan?

Electricity supplies worldwide can vary from anything between 100V and 240V. It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply. As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Pakistan.

S.R.O.1 110(1)12023.--In exercise of the powers conferred by section 46 of the Regulation of Generation, Transmission and Distribution of Electric Power Act, 1997 (XL of 1997), ...

FCDO travel advice for Pakistan. Includes safety and security, insurance, entry requirements and legal differences.
