

Philippines promotes solar energy storage

The Philippine Solar and Storage Energy Alliance (PSSEA) is the country's leading alliance dedicated to advancing solar and energy storage as integral solutions for a sustainable ...

THE Philippines is at a crossroads: abundant solar potential, rising corporate demand for clean energy, and evolving grid dynamics converge to create a window of opportunity but only if ...

As such, she has played a major role in the development of the solar PV industry in the Philippines and the wider ASEAN region of Southeast Asia and now advocates for the essential and ...

The MTerra Solar project in the Philippines has reached a major milestone with the successful initial grid synchronization and energization of its first phase. Located in Nueva Ecija, this ...

This initiative combines a 120-megawatt solar farm with a 40-megawatt energy storage facility, demonstrating how battery technology can store excess solar power and release it when ...

The first phase of the MTerra solar project in the Philippines, set to be the world's largest solar-plus-storage site once completed, has achieved initial synchronization and energization to the ...

The facility also integrates a 4.5 GWh battery energy storage system (BESS), making it one of the largest solar-plus-storage developments globally. As of January 2026, Phase 1 had installed ...

Learn about market trends, government incentives, and how solar-plus-storage solutions are reshaping energy security. Discover why this tropical nation is a hotspot for renewable energy investments.

The Philippines Department of Energy (DOE) has outlined new draft market rules and policies for energy storage, a month after the country allowed 100% foreign ownership of renewable ...
