

This table includes the total shipments, values, and average values of module shipments by year and month. This table is a compilation of annual Tables 2, 3, and 4.

In the first three quarters of 2024, global utility-scale energy storage cell shipments reached 180 GWh, up 49.4% YoY. The top five manufacturers, CATL, EVE Energy, Hithium, CALB, ...

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

From grid-scale battery systems to residential power solutions, shipment volumes reveal which technologies dominate solar integration, wind farm stabilization, and industrial backup applications.

Global energy storage shipments jumped 84.7% in the first three quarters of 2025, with Tesla and Chinese manufacturers leading the charge, says InfoLink.

NLR's quarterly solar industry updates provide information on trends within the solar industry. These quarterly updates cover an array of photovoltaic module and system technologies as ...

While some PCS suppliers are globally focused, many suppliers focus on a few key markets in FTM. This is due to the requirement to be able to provide timely support via local teams to ...

In 2024, 24 states and territories generated more than 5% of their electricity from solar, with California leading the way at 32.4%. The United States installed approximately 31.1 GWh (12.3 ...

Discover all statistics and data on Global solar PV supply chain now on statista !

According to InfoLink's Global Energy Storage Supply Chain Database, global energy storage cell shipments totaled 410.45 GWh in Q1-Q3 2025, up 98.5% YoY.
