

Photovoltaic panels exempt from export inspection

What are the rules for the export of photovoltaic modules?

Detailed explanation of the core rules for the export of photovoltaic modules, including HS classification (assembled modules under 8541430000), declaration elements, international FTA tariff preferences (such as RCEP), and quality standards (IEC 61215).

Will bifacial solar panels be exempt from tariffs?

In his announcement, the President included an exemption for bifacial solar panels. This decision comes after the ITC recommended in November 2021 to extend the safeguard tariffs for an additional four years.

Proclamations

What is China's export code for photovoltaic inverters?

However, the latest HS breakdown shows unassembled photovoltaic cells under 8541.42 and those assembled into modules under 8541.43. China's export code usually corresponds to 8541430000. Heading 85.04: Photovoltaic inverters Classified as static converters, subheading 8504.40.

What is the tax refund rate for photovoltaic modules?

Tax Rebates: The refund rate for photovoltaic modules (HS 8541.40/8541.43) has been reduced from 13% to 9%, effective from December 1, 2024. There may be differences for different classifications (such as brackets), so it is recommended to verify the latest rates. Currently, there are no export tariffs.

China has announced significant changes to its export tax rebate policies, effective from December 1, impacting various industries, including photovoltaic (PV) products.

For both CSPV cells and modules, products of all countries are covered except for the following:

This policy adjustment applies specifically to solar cells and modules under HS codes 85414200 (unassembled photovoltaic cells) and 85414300 (assembled photovoltaic modules). The change ...

Here is a step-by-step guide on choosing a supplier, pricing, quality control, delivery, customs clearance, and compliance requirements for importing solar panels from China to the United ...

Export License: Photovoltaic modules themselves generally do not require an export license, but if they involve energy storage components such as lithium-ion batteries, it is necessary ...

Although these imports are currently exempt from tariffs until June 7, 2024, pending investigations could lead to significant AD/CVD tariffs as early as mid-summer 2024. Since 2012, ...

Many countries across the world have built up a policy framework which is aimed at supporting the development of renewable energy technologies, including PV and picoPV products. Fiscal ...

Photovoltaic panels exempt from export inspection

At the time of the investigation, solar panels from Southeast Asia made up 80% of supply in the United States, and exporters stopped bringing in more panels for fear of high retroactive duties.

On September 12, 2024, the USTR released a Section 301 tariff exemption list for photovoltaic equipment, effective from January 1, 2024, to May 31, 2025. Out of 19 exemption applications, 14 ...

In his announcement, the President included an exemption for bifacial solar panels. This decision comes after the ITC recommended in November 2021 to extend the safeguard tariffs for an ...
