

2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, pressuring early ...

With a well-filled pipeline, rising permit volumes, and a clear strategy, PNE AG remains on track despite short-term weather-related challenges. CEO Wuttke confirms the full-year forecast: "We believe we ...

With its headquarters in Cuxhaven, the PNE WIND Group plans and realises wind farm projects on land and on the high seas. In doing so, its core competence lies in the development, planning, financing, ...

Consequently, I'll focus this article on onshore wind power projects and how they compare with pipeline projects.

Within the database, discover comprehensive and accurate renewable energy data, forecasts, and dashboards for offshore wind globally, as well as find out who is contracting with who.

America's offshore wind project pipeline grew 53% from 2023 to 2024, reaching a potential generating capacity of 80 GW, according to the U.S. Department of Energy (DOE).

To provide current information and discussion on the emerging offshore wind industry in the United States, this report tracks significant U.S. domestic progress and events from Jan. 1, 2023, to May 31, 2024. Maps of the ...

The wind energy market size crossed USD 174.5 billion in 2024 and is expected to grow at a CAGR of over 11.1% from 2025 to 2034, driven by the growing adoption of off grid & distributed energy system.

The year-over-year increase was driven primarily by storage and wind: the storage pipeline grew 57% year-over-year to near 50 GW, and the land-based wind pipeline increased by 24% to 28 GW.

Pipeline wind power generation industry
