

Quick installation of solar panel bracket

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How to choose solar mounting brackets?

When choosing solar mounting brackets, you'll need to take into account several key factors. Think about the compatibility with your mounting surface, the durability of the materials, and how easy the installation will be. Don't forget to check for adjustable angles and weather resistance to guarantee peak performance.

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.
