

# Slope requirements for photovoltaic support structure diagram

About the Renewable Energy Ready Home Specifications Assumptions of the RERH Solar Photovoltaic Specification Builder and Specification Limitations 1.5 Document the solar resource potential at the designated array location 3.3 Install a conduit for the AC wire run from the designated inverter location to the electric service panel 4.2 Record the name and Web address of the electric utility service provider 5.1 Landscape Plan 5.2 Placement of non-array roof penetrations and structural building elements Appendix A: RERH Labeling Guidance

These specifications were created with certain assumptions about the house and the proposed solar energy system. They are designed for builders constructing single family homes with pitched roofs, which offer adequate access to the attic after construction. It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mou... See more on #b\_results
