

This report provides an in-depth analysis of Austria's PV market and developments over the past year. 2023 was a landmark year for PV installations in Austria, with a total of 2.6 GW of new photovoltaic ...

Driven by increasing government incentives aimed at achieving ambitious renewable energy targets, coupled with rising energy prices and growing environmental awareness among both residential and ...

Over 80 per cent of Wien Energie's solar energy plants are on the roofs of buildings. However, other sites will also need to be used for photovoltaic expansion in order to achieve Vienna's climate goals.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 124 locations across Austria. This analysis provides insights into each city/location's potential for harnessing solar ...

Solar energy is a rapidly growing sector in Austria, making significant contributions to the country's renewable energy goals and overall sustainability. The Austrian solar energy market encompasses ...

On-grid installations represented 99.28% of the Austria solar energy market share in 2025 and are forecast to grow at a 6.55% CAGR to 2031, outperforming the total market as ...

Austria's photovoltaic (PV) boom is gaining momentum. Nearly 500 MW of PV came online in Q1 of 2024 according to Austria's electricity regulator eControl, a 77% increase over the ...

By July 2025, Wien Energie will already be operating 500 photovoltaic systems in Austria. The company thereby achieves a total output of around 200 megawatts and actively promotes the energy...

The Austria Renewable Energy Market Report is Segmented by Technology (Solar Energy, Wind Energy, Hydropower, Bioenergy, Geothermal, and Ocean Energy) and End-User ...
