

Songbai Solar Power Generation

Why is the Gobi Desert a great place for solar power?

This intense dryness, as well as the abundant sunlight of more than 3,000 hours a year, make the Gobi Desert an excellent environment for large-scale solar power generation. The incredible solar-thermal power station reportedly features two 656-foot-high (200 meters) towers, each surrounded by a vast field of 27,000 mirrors known as heliostats.

Why is China launching a solar power project?

For China, the project represents a strategic evolution in the country's renewable energy landscape. The east Asian country rapidly expanded its solar and wind capacity in the past decade, particularly across its western provinces of Gansu, Xinjiang, and Qinghai.

Can a photovoltaic power station be built in the desert?

"Building a photovoltaic power station in the desert is not easy, and requirement for solar equipment is higher due to the windy and sandy environment in the desert," Miao Ruijun, deputy head of Mengxi New Energy Dalad Photovoltaic Power Station in SPIC Nei Mongol Energy Co, told the Global Times at the site on Saturday.

Who is Shanghai Electric Power Generation Engineering Company?

Shanghai Electric Power Generation Engineering Company is one of the core businesses of Shanghai Electric Group, a large equipment manufacturing conglomerate in China.

Developed by the Three Gorges Corporation, a wind and solar energy company headquartered in Guazhou County, China, the new facility combines efficiency, innovation and large ...

Using tons of molten salt, solar thermal power stations can store heat so as to guarantee continuous and stable output, overcoming the bottleneck of photovoltaic power generation which is ...

Strolling around the Junma Solar Power Station located in the Kubuqi Desert in Ordos, North China's Inner Mongolia Autonomous Region, it's hard for visitors to imagine that the area, now...

Shanghai Electric Power Generation Engineering Company is one of the core businesses of Shanghai Electric Group, a large equipment manufacturing conglomerate in China.

From a sand dune in Zhongwei, northwest China's Ningxia Hui Autonomous Region, neat rows of photovoltaic panels stretch across the Tengger Desert, transforming the golden sands into a ...

Spanning an area of 76.02 square kilometers, equivalent to 10,647 standard football fields, the project is equipped with 5,537,224 solar panels, 1,280 power generation unit arrays, and four ...

Solar energy is converted into green electricity at the project and transmitted to factories, companies and households in Xinjiang and beyond. Adjacent to the solar array, a "super power ...

Songbai Solar Power Generation

Data and information about power plants and their location across the globe. All plotted on an Interactive world map

Hunan Jiangyong Songbai solar farm is a solar photovoltaic (PV) farm in pre-construction in Songbai Town, Jiangyong, Yongzhou, Hunan, China.

Primarily focusing on large-scale wind and solar power development with a total installed capacity of 13 million kW, the project, the country's first in response to the government's ambitions to ...
