

Specialized roof tiles for solar installation

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What are thermal solar tiles & hybrid solar tiles?

Thermal solar tiles are created primarily to catch and use solar heat instead of PV panels, which concentrate on generating electrical energy. Hybrid solar tiles are roofing shingles that produce solar energy and mix solar and non-solar tiles to produce a roof that both produces energy and protects against the weather.

Which roof shingles are compatible with solar tiles?

Asphalt shingles, the most common roof, are compatible with various solar tile systems. In addition, the old shingles can be blended with solar tiles to create a seamless appearance. Another important factor to consider while selecting solar tiles is the state of your roof.

Can you install solar tiles on a metal roof?

Solar installations are typically a good fit for metal roofs. The mounting solutions for metal roofs can attach solar tiles directly to the metal surface. To maximize solar energy generation on flat rooftops, tilting or elevated mounting techniques are needed. Asphalt shingles, the most common roof, are compatible with various solar tile systems.
