

Teplöre is proud to announce the successful commissioning of its first Battery Energy Storage System (BESS) project in Budapest, Hungary. This milestone marks a significant step in our ...

Summary: Explore how Budapest is pioneering liquid cooling energy storage solutions to address modern energy demands. This article examines the technology's benefits, local applications, and ...

MET Group put into operation a battery electricity storage plant with a total nominal power output of 40 MW and a storage capacity of 80 MWh (2-hour cycle). It is the latest example in a series ...

Summary: Explore how super capacitor technology is transforming energy storage in Budapest. Discover applications across renewable energy, transportation, and industrial sectors, supported by ...

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Both the energy storage unit and the gas engines play an important role in the regulation of the electricity system through the ALTEO Virtual Power Plant. The gas engines - in parallel - ...

E.ON Hungaria has unveiled a state-of-the-art storage system in Soroksár (23rd district of Budapest), doubling its local capacity and setting a new benchmark for smart grid integration in the ...

The facility sits on the outskirts of Budapest, strategically positioned to serve both urban energy demands and regional grid stabilization. Operational since 2022, it covers 12 hectares and integrates ...

MET Group has officially opened Hungary's largest battery energy storage system (BESS) at its Dunamenti gas power plant near Budapest. The facility has a capacity of 40 megawatts ...

At the official inauguration ceremony, Péter Horváth, CEO of the Dunamenti Power Station, emphasized: "The application of battery energy storage systems is a key element on the ...
