

Authorities stressed that the shift toward renewable energy is a national priority. Concrete projects in solar and wind power have already begun, with plans in motion to fully reach the ...

Two 3 MW solar power plants with 0.5 MW battery storage are planned for Sughd and GBAO under a South Korean cooperation agreement. Tajikistan aims to add up to 1,500 MW of solar ...

This infographic summarizes results from simulations that demonstrate the ability of Tajikistan to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat supply, storage, and ...

Currently, 18 investment projects totaling 1.5 billion US dollars are reportedly being implemented in the country. They are aimed at constructing large hydropower plants and renewable ...

Despite the dominance of hydropower, Tajikistan holds significant potential for the development of solar and wind energy. The country receives an average of about 300 sunny days ...

Tajikistan plans to generate up to 10% of its electricity with renewable energy sources such as wind and solar, Energy and Water Resources Minister Daler Juma said at a press ...

The solar and wind power initiative is expected to create thousands of jobs, stimulate local economies, and improve energy access for millions of people in Tajikistan.

Tajikistan is one of the most energy-intensive countries in the region. Aging heating systems, poorly insulated buildings, and inefficient technologies in agriculture and industry all ...

Tajikistan seeks to enhance its energy system resilience by reconnecting to the United Energy System of Central Asia. This effort is supported by large infrastructure projects of common interests, such as ...

Powering an Energy-Secure Future Across Central Asia How the World Bank Group is helping the Kyrgyz Republic, Tajikistan, and Uzbekistan expand and diversify energy production, ...

Tajikistan Wind Solar and Storage
