

Telecom Energy Storage Clean Energy Storage Liquid Cooled Battery Cabinet

Our newly launched liquid cooling energy storage system represents the culmination of 15 years" expertise in lithium battery storage innovation. This liquid cooling energy storage system ...

Vericom energy storage cabinet adopts All-in-one design, integrated container, refrigeration system, battery module, PCS, fire protection, environmental monitoring, etc., modular design, with the ...

The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, efficient, and flexible energy storage system.

The ECO-EMS series of products is an integrated energy management system designed for energy storage application scenarios. They enable real-time monitoring, diagnostic warning, panoramic ...

The GSL-CESS-125K232 is a next-generation energy storage battery cabinet engineered to meet the growing demands of smart power infrastructure. With a 125kVA output and 232kWh usable capacity, ...

Equipped with an independent liquid cooling system, it achieves higher energy density and enhanced heat dissipation within a compact footprint, while offering advantages such as high efficiency, low ...

Its liquid cooling technology guarantees optimal performance even in confined spaces, making it ideal for both large industrial facilities and smaller public utility deployments.

Combines power supply, monitoring, and cooling functions, simplifying system setup and enhancing overall reliability. Supports remote monitoring and smart alerts for full lifecycle power system ...

Engineered with Grade A LiFePO4 cells, multi-level protection, and AI-powered monitoring, our liquid-cooling storage cabinet delivers safe, efficient, and scalable energy solutions for modern power needs.

Our professional R& D team focuses on meeting the individual needs of our clients, tailored to create efficient and stable battery solutions that facilitate the successful implementation of projects.
