

The photovoltaic panels on the roof are always leaking

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

Can solar panels be installed on a roof?

Most modern roofs are compatible and able to withstand the installation of solar panels, but in some cases, the roof material is susceptible to leaks. If your roof is made from clay, terracotta, wood shingles, or slate, there is an increased risk of leaks developing through the installation.

What causes a roof leak?

There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment. These are not issues you can resolve yourself, and since your warranty would cover these issues, your first call should be to your installer.

Can composite shingles be hidden under solar panels?

Since composite shingles will be invisible as they are hidden away under the solar panels, there will be no impact on the roof's aesthetics or the home, and you can rest assured that there will be no leak issues once this is complete.

Learn how to fix roof leaks under solar panels with practical tips, step-by-step guidance, and expert advice to protect your roof and energy system.

Solar panels are made of solid glass suitable for all kinds of roofs, so this is a resounding no. Unless you're doing something wrong, perhaps with the installation, there's no reason your solar ...
