Macquarie-backed Eku Energy closes first Japan battery storage project with Tokyo Gas offtake contract

Tokyo's new large-scale energy storage project is set to begin construction in Q1 2025, marking Japan's most ambitious battery storage initiative to date. This renewable energy solution aims to address ...

The Tokyo Energy Storage Phase II project isn't just another battery installation; it's sort of the linchpin for Japan's 2030 carbon neutrality goals. By 2026, this 820MWh facility will store enough renewable ...

Tokyo Asset Solution pivots into 13.2MWh battery storage, testing Japan's grid-flex future and diversifying beyond real estate amid decarbonization demand.

As Japan accelerates its transition to renewable energy, this \$82 billion initiative aims to create a 450MW capacity storage system beneath Tokyo's metropolitan area - imagine stacking 15,000 ...

Expert Insight: 'Distributed storage isn't just backup power - it's becoming Tokyo's digital energy currency. Our trading platform allows buildings to sell stored solar energy during peak hours at 3x ...

Home battery storage aggregation projects have launched with participation of Tokyo Electric Power Co, and Tokyo Gas, two major utility companies in the Japanese capital.

LS Electric will deploy a 20MW/90MWh battery energy storage system (BESS) in Japan after it was awarded the contract through a competitive solicitation process.

Battery storage developer Eku Energy has partnered with utility Tokyo Gas on a grid-scale energy storage project in Japan, with construction expected to start soon.

12 grid-scale BESS projects totaling 180MW/595MWh secure 13B yen from Tokyo's FY2024 subsidy scheme Enehub Archive #183; March 7, 2025
