

UK 400MWh energy storage project

Zenob?, the battery storage and fleet electrification specialist, has today announced one of the largest standalone battery storage financings in Europe for its latest Battery Energy Storage System (BESS) ...

The project, jointly developed by Recurrent Energy and Windel Energy, will see the construction & energisation of a 200MW/400MWh, Battery Energy Storage System, with associated infrastructure and ...

Zenob? has secured £220 million in financing for its 400MW/800MWh battery energy storage system (BESS) in Eccles, Scotland, set to go live in early 2027. This marks one of Europe's largest ...

Technology group Wärtilä; has launched a 200MW/400MWh energy storage system for energy solutions provider Zenob? in Blackhillock, Scotland, UK. The system is claimed to be the "largest" ...

Firstway Energy has received planning approval for three BESS projects totaling 400 MW capacity across England, with all approvals secured on February 4, 2025. The largest of the three projects is a ...

19th March 2025 - London, UK Zenob?, the battery storage and fleet electrification specialist, has today announced it has reached financial close and begun construction of its latest battery storage system in ...

The 200-MW/400-MWh energy storage system provided by Wärtilä; Energy Storage to owner and operator Zenob? in Blackhillock, Scotland, entered commercial operation earlier this year.

Statera Energy has secured planning permission for a 400MW battery energy storage system (BESS) for up to 6 hours duration near Chickerell, Dorset.

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean energy.

Zenob? has started work on a 400 megawatt (MW) battery energy storage system (BESS) in Scotland, which will be twice as big as Europe's current largest operational BESS.
