

Uruguay texas energy storage

Why is energy storage growing in Texas?

Energy storage and renewables are expanding rapidly in Texas's free-market system, building resilience, lowering costs, and drawing comparisons with Alberta, its Canadian counterpart. Renewables and energy storage capacity has skyrocketed across Texas, despite its history and culture steeped in oil and gas.

What is Uruguay's energy strategy?

In 2005, Uruguay initiated a dramatic shift in its energy strategy, moving from petroleum-based electricity generation to renewable sources. In 2024, Uruguay generated 99 percent of its electricity from renewable sources using hydropower (42 percent), wind (28 percent), and biomass (26 percent).

How much electricity does Uruguay export to Brazil?

In 2024, UTE, the state-owned company in charge of managing Uruguay's electrical grid, officially reported exporting 2.026 GWh for approximately \$104 million in energy exports. One of the limiting factors for electricity exports to Brazil are the number of cross-border connections, currently 570 MV from Melo and 70 MV from Rivera.

Why does Uruguay have a surplus of electricity?

Uruguay generally has a surplus of electricity due to excess wind-power installed capacity. The country seeks to identify additional domestic uses for excess electricity and potentially increase exports to Argentina and Brazil.
